STANDARDS, QUALITY & CODES

STANDARDS

Vaculine® fittings are manufactured in compliance with ASTM F2158, Standard Specification for Residential Central Vacuum Tube and Fittings.

The scope of this standard includes material and performance requirements for tube and fittings used in central vacuum systems. It also offers a recommended installation practice that provides step by step instructions, including a "how to" plan to install a central vacuum system and a list of tools to complete the installation.

Compliance with the standard is confirmed when either the tube or fitting is marked with ASTM F2158 and the mark of a recognized Third Party Testing Organization. The Manufacturer is then declaring that the product was manufactured, inspected, tested and listed in accordance with the Standard Relevant Building Codes.

QUALITY

Canplas Industries Ltd, is an ISO 9001: 2000 Company. Certification was originally received December 18, 2000 and currently registered with QMI®, a division of CSA Group.

CODE

The use of any product in the construction/building environment is governed by Construction Codes administered by Local Jurisdiction's Having Authority (JHA). The Construction Code that includes reference to Central Vacuum Cleaning Systems is the Uniform Mechanical Code (UMC), published by the International Association of Plumbing and Mechanical Officials (IAPMO R&T) which is available at: www.iapmo.org under the Product Listing Directory.

Vaculine® fittings are approved and listed to the IAPMO requirements and can be found under the Canplas Industries Ltd listings. A copy of the central vacuum fitting listing certificate can be viewed and downloaded from the IAPMO R&T website.

Standards and Codes are living documents that change from year to year and can affect the design and use of Central Vacuum Fittings.

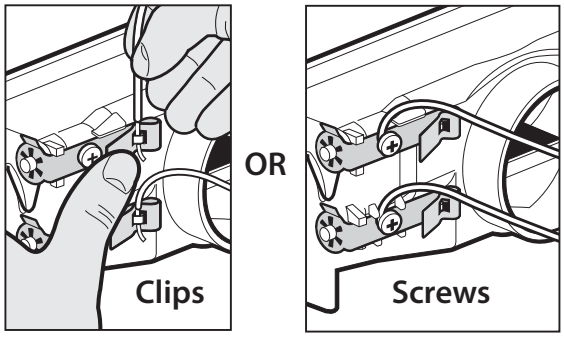
Sweep Inlets

CanSweep®

SWEEP INLET VALVE

THE EASY OPEN-N-CLOSE VALVE

- Modern design with textured appearance
- Large outlet design for maximum airflow
- Zero loss of suction



New Easy & Reliable Wiring Connections

CANSWEEP®

- FITS EASILY IN THE KICK SPACE OF A CABINET, OR WITHIN A 2" X 4" STUD WALL

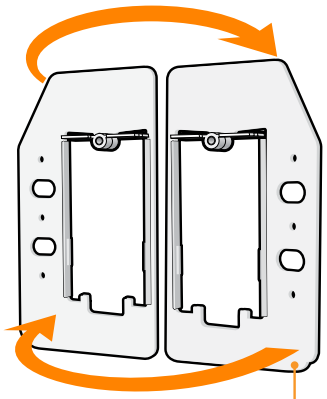
SuperValve®

YOU DECIDE YOUR INSTALLATION

LEFT/RIGHT



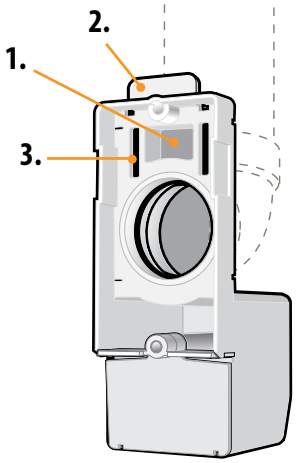
Reversible Flange

Unlike a traditional valve, the flange of this new valve is completely separate from the body, therefore it can either be placed on the left or right of the stud depending on your installation requirements.

NEW!

Larger lower flange for stronger installations.

UP/DOWN



Newly designed features

1. Recessed mini box accommodates valve plug when back plate is installed upside down.
2. Tab adds extra strength and stability to the retro-fit installation.
3. Low volt wire slots allow you to position the wire on either side of the pipe.

SuperValve® - Full Door

LARGER ELECTRICAL ACCESS FOR EASY WIRING

Notes:

CAUTION
Vaculine® does not recommend the use of thermoplastic piping systems for transport or storage of compressed air or other compressed gasses or the testing of such systems with compressed air or other ground locations.

Use of our plastic piping products in exposed compressed gas systems voids our warranty on the products used.

For further information, please contact your Vaculine® representative.

WARRANTY
Seller's products are carefully inspected for manufacturing defects. However, it is not always possible to detect hidden defects. Said products are warranted only to the extent that the seller will replace, without charge, products proven to have manufacturing defects, within six (6) months of the date of delivery thereof and provided seller has been given an opportunity to inspect the product alleged to be defective and the installation of use thereof.

NO WARRANTY is included against any expense for removal, reinstallation or other consequential damages arising from any defect.

The warranties set out above are the only warranties made by the seller and are expressly in lieu of any other warranties, expressed or implied including the warranties of merchantability and fitness for a particular purpose.

Vaculine®, VacuSweep®, ES® Valve, ElectraValve®, CanSweep® and VacuValve® are registered trademarks of Canplas Industries Ltd.
